## Colour Energy - About

When all our energy centres are in balance, we exude all of the colours of the rainbow. If there are disturbances on any level this shows in our aura. This means that the energies will not be flowing evenly and smoothly within our system - something is off balance. Through the light and the sun you receive the colour energy you need for a healthy body-it is only when something has been blocked or is out of proportion that you need the assistance of other colour energies. Every colour is an energy and colour energy can help make you more consciously aware and balanced.
